Paperlive Learning | In collaboration with Microsoft

COURSE BROCHURE

Data Science Course with Placement Assistance

Python • Machine Learning • AI

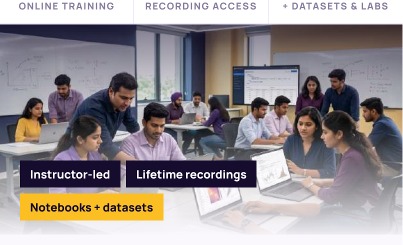

Live, instructor-led — from Python and SQL through deep learning, MLOps and agentic AI, then a domain capstone. Built with Microsoft.

150+	10	8+	5.0

01 — MARKET

Why data science, why now

1.2 L+ Data & AI openings in India	**28%** CAGR through 2030
1 in 3 New tech roles need AI/ML	**₹40L+** Lead data scientist ceiling

SALARY BY EXPERIENCE — INDIA · 2025–26

TOP HIRING HUBS

Bengaluru · Hyderabad · Pune · Mumbai · NCR

02 — CURRICULUM

Ten modules, four phases

64h foundations · 40h ML & DL · 24h MLOps & Gen AI · capstone + self-paced BI.

01 Programming & Data Foundations
MODULES 01–05 · 64H

MODULE 01 — 18 h
Programming Foundations with Python

Environment setup (Colab, VS Code, Anaconda) · syntax, variables, control flow and loops · lists, tuples, sets, strings, dictionaries · functions, scope, lambdas, decorators · error handling and safe file I/O.

PROJECT: **Build-your-own command-line calculator** — Validated numeric input, four operations, graceful error handling.

MODULE 02 — 12 h
Database Fundamentals with SQL

Tables, constraints and keys · SELECT, WHERE, ORDER BY, DISTINCT · INSERT/UPDATE/DELETE, transactions, NULL handling · joins and UNION · GROUP BY, HAVING, CASE, correlated subqueries, CTEs.

MODULE 03 — 6 h
Spreadsheet Analytics with Excel

Workbooks, formatting, AutoFill, cell references · sorting, filters, validation, text functions · SUM/AVERAGE/COUNT, IF/AND/OR, VLOOKUP, XLOOKUP, INDEX-MATCH.

PROJECT: **Classroom insights dashboard** — Clean a raw attendance-and-marks dataset and surface performance metrics.

MODULE 04 — 16 h
Data Wrangling & Exploratory Analysis

NumPy arrays and broadcasting · Pandas loading, indexing, missing data, grouping · EDA, outlier detection, correlation · hypothesis testing (t-tests, ANOVA, Chi-square) · Matplotlib & Seaborn.

PROJECT: **Titanic survival dataset deep-dive** — Z-score outlier handling, feature engineering, multivariate analysis.

MODULE 05 — 12 h
Statistics & Probability for Analytics

Descriptive vs inferential statistics · central tendency, spread, distribution shape · sampling, confidence intervals, p-values · Bayes' theorem and key distributions · linear algebra essentials.

PROJECT: **Product performance insight report** — Test hypotheses and model the drivers behind product performance.

02 Machine Learning & Deep Learning
MODULES 06–07 · 40H

MODULE 06 — 28 h
Machine Learning

Supervised, unsupervised and reinforcement learning · regression (linear, polynomial, Ridge, Lasso) · classification (logistic, KNN, SVM, Naive Bayes) · ROC-AUC, cross-validation, grid search · trees, random forests, clustering · AdaBoost, Gradient Boosting, XGBoost · time-series and TF-IDF.

PROJECT: **Subscriber retention predictor** — End-to-end churn model — encoding, missing-data strategy, scaling, evaluation.

MODULE 07 — 12 h
Deep Learning & Computer Vision

Neurons, activations, backpropagation, gradient descent · TensorFlow and Keras · CNNs, image preprocessing, augmentation · transfer learning with VGG and ResNet · RNNs and LSTMs · YOLO object detection.

PROJECT: **Everyday object vision classifier** — Train and evaluate a CNN with preprocessing and performance visualisations.

03 MLOps & Generative AI
MODULES 08–09 · 24H

MODULE 08 — 10 h
MLOps & Cloud Deployment

IaaS/PaaS/SaaS, regions and availability zones · ML on AWS: SageMaker, Comprehend, Rekognition, Polly, Lex · IAM and cost optimisation · the ML lifecycle · DVC, Git and MLflow versioning, CI/CD, Docker · serving with FastAPI and Uvicorn.

MODULE 09 — 14 h
Generative & Agentic AI

Predictive vs generative AI · foundation models, tokenisation, embeddings, transformers · semantic search, vector databases and RAG · prompt engineering · agentic AI: goals, memory, tool use, feedback loops · function calling, AIOps and Responsible AI.

PROJECT: **Domain support assistant** — An LLM-powered assistant handling support conversations for your chosen domain.

04 Capstone & Business Intelligence
MODULE 10 · 8H + SELF-PACED

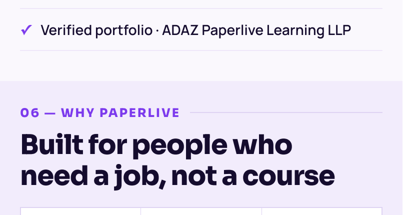

MODULE 10 — 8 h
Capstone Immersion Project

Pick one domain challenge and take it from raw data to a mentor-reviewed, portfolio-ready result — plus self-paced Power BI and Tableau tracks.

Power BI	Tableau
SELF-PACED	SELF-PACED
Power Query, DAX, visualisations, dashboards.	Excel sources, charts, reports, dashboards.

03 — TOOLKIT

Python · SQL · Excel · NumPy · Pandas · Matplotlib · Seaborn · scikit-learn · XGBoost · TensorFlow · Keras · PyTorch · YOLO · MLflow · DVC · Docker · FastAPI · SageMaker · LLM APIs · Vector DBs · Power BI · Tableau

8+ projects. One domain capstone.

Real datasets, mentor reviews, a portfolio you can show.

04 — CAPSTONE DOMAINS

Healthcare trends — PUBLIC HEALTH	Emotion recognition — MARKETING
Distracted driver — AUTOMOTIVE	E-commerce insights — RETAIL
Demand forecasting — SUPPLY CHAIN	Customer attrition — TELECOM
Recommendation engine — MEDIA	Crop yield prediction — AGRICULTURE

05 — CREDENTIALS

- ✓ Business Intelligence certification
- ✓ Verified portfolio · ADAZ Paperlive Learning LLP

06 — WHY PAPERLIVE

Built for people who need a job, not a course

150+	100+	1:1
TRAINING HRS	HRS PRACTICAL	MENTORSHIP
8+	**8**	**5000+**
PROJECTS	CASE STUDIES	HIRING PARTNERS

Live instructor-led training
Every session taught live, never pre-recorded playback.

Guaranteed job opportunities
100% placement assistance backed by 5000+ hiring partners.

Microsoft collaboration
Industry-recognised curriculum and certification.

Microsoft admission kit
A physical welcome kit shipped when you join the programme.

Resume & interview preparation
Unlimited mock interviews and a 1000+ question bank.

Lifetime recording access
Notebooks, datasets and recordings stay yours forever.

07 — HIGHLIGHTS

Everything the bootcamp includes

01 **150+ hours of live, instructor-led training**
Python, SQL, ML and AI directly from certified industry mentors in real-time sessions.

02 **100+ hours of hands-on lab & project work**
Build real skills through projects and case studies, not passive video lectures.

03 **100+ hours of 1:1 mentorship & career coaching**
Personalised guidance from enrollment to offer letter.

04 **Practitioners with 10+ years of experience**
Train under data scientists who have actually built and shipped ML systems.

05 **Python, SQL, ML, Deep Learning & Generative AI**
A complete, job-focused curriculum — no filler modules.

06 **10 capstone projects for your portfolio**
Walk into interviews with real, demonstrable work recruiters want to see.

07 **8 real-world case studies across industries**
Finance, retail, healthcare and more — data science on actual business problems.

08 **Mock interviews with industry experts**
Practice under real interview conditions before it counts.

09 **Personalised interview preparation**
Sharpen your technical storytelling and communication before you sit across the table.

10 **Dedicated hiring network access**
We actively put your profile in front of our hiring partner network.

11 **Job-ready in just 6 months**
Nearly 2x faster than industry-standard programmes.

12 **100% job opportunity guarantee**
No opportunity secured, career fee refunded — backed by a signed agreement.

OPPORTUNITY RANGE	CAREER FEE
5–45 LPA Real earning potential once you're placement-ready.	**15% of fee** The only portion at risk — fully refundable if we don't deliver.

08 — OUTCOMES

What you will be able to do

01 Write production-quality Python and SQL for real analytical work

02 Clean and explore messy datasets, then defend findings statistically

03 Build, tune and evaluate regression, classification and clustering models

04 Train CNNs and sequence models for vision and time-series problems

05 Ship models to the cloud with Docker, FastAPI, MLflow and SageMaker

06 Build RAG pipelines and agentic AI workflows on top of LLM APIs

07 Turn analysis into executive-ready Power BI and Tableau dashboards

08 Interview with a domain capstone and 8+ projects in your portfolio

09 — CAREER

Everything after the last class

Role-based resume building	LinkedIn optimisation
1000+ interview questions	Soft skills grooming
Workshops with top MNCs	Unlimited mock interviews

6 guaranteed job opportunities every month
5000+ hiring partners · 100% placement assistance

5000+ HIRING PARTNERS · + 4,988 MORE

10 — CERTIFICATION

Three certificates, one programme

Every graduate receives a Course Completion Certificate issued in collaboration with Microsoft, a Project Experience Certificate detailing the work they actually shipped, and a globally recognised Microsoft Certification.

01 **Course Completion Certificate**

AUGUST-2026

Paperlive Learning | In collaboration with Microsoft

CERTIFICATE OF COMPLETION

PROUDLY CERTIFIES THAT

CHIRANJEEVI

has successfully completed all training modules, hands-on projects, and assessments in **Data Science**, under the guidance of experienced mentors and instructors at PaperLive Learning, and has been awarded a Course Completion Certificate in **Data Science.**

ADIL HASNAIN — CO-FOUNDER | CERTIFICATION CODE PL-085-88 | SAYED AZMAT ALI — CO-FOUNDER

CO-SIGNED BY BOTH FOUNDERS · UNIQUE CERTIFICATION CODE · VERIFIABLE

02 **Project Experience Certificate**

Paperlive Learning — ADAZ PAPERLIVE LEARNING LLP — support@paperlive.in

Project Experience Certificate

Certificate No.: [PL-085-88]

This is to certify that **Chiranjeevi** has successfully completed hands-on project work as part of the **Data Science Program at PaperLive Learning**, conducted from **March 2026 to August 2026.**

During the program, the candidate demonstrated practical knowledge and hands-on expertise in executing projects involving:

- Programming & Data Analysis: Python, SQL, Pandas, NumPy, and Jupyter Notebook
- Data Visualization: Matplotlib, Seaborn, Power BI/Tableau, and data storytelling techniques
- Machine Learning: Supervised and unsupervised learning, including regression, classification, clustering, and model evaluation
- Data Preprocessing: Data cleaning, transformation, feature engineering, handling missing values, and exploratory data analysis (EDA)
- Statistical Analysis: Applying statistical concepts and analytical techniques to interpret data and support data-driven decision-making
- Generative AI & Large Language Models (LLMs): Practical utilization of Generative AI concepts and tools to enhance data analysis, automate workflows, extract insights, and support intelligent decision-making

Project Areas Covered:

- End-to-end data analysis and visualization projects using real-world datasets
- Exploratory Data Analysis (EDA) and business insight generation
- Machine learning models for prediction and classification problems
- Customer segmentation and clustering projects
- Data-driven business analytics and dashboard development

The candidate has shown dedication and a strong understanding of data analysis, machine learning, statistical concepts, and data-driven problem-solving, making them well-prepared for industry roles in Data Science and Analytics.

We wish them continued success in their professional journey.

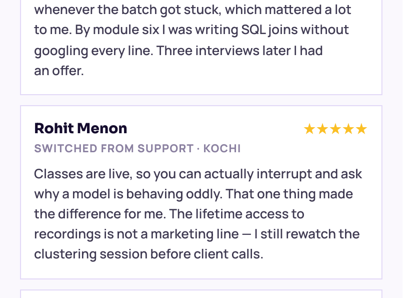

Sincerely,

Sayed Azmat Ali
Adil Hasnain
CEO

LISTS EVERY SKILL AND PROJECT AREA THE CANDIDATE SHIPPED

03 **Microsoft Certification**

Microsoft

Rahul Sharma

has successfully passed all requirements for

Microsoft Certified: Machine Learning Operations Engineer Associate

Credential ID: 12345678
Certification number: 9876-5432-1A2B3C
Earned on: April 25, 2025
Expires on: April 25, 2026
✓ Online Verifiable

Microsoft Certified — Machine Learning Operations Engineer — Associate

Satya Narayana Nadella — Chief Executive Officer — Microsoft Corporation

GLOBALLY RECOGNISED · ONLINE VERIFIABLE CREDENTIAL

11 — REVIEWS

What learners actually say

★★★★★ 5.0 average · verified reviews

Ananya Deshpande ★★★★★
DATA ANALYST · PUNE
I came in knowing only basic Excel and honestly thought I'd fall behind. The trainers slowed down whenever the batch got stuck, which mattered a lot to me. By module six I was writing SQL joins without googling every line. Three interviews later I had an offer.

Rohit Menon ★★★★★
SWITCHED FROM SUPPORT · KOCHI
Classes are live, so you can actually interrupt and ask why a model is behaving oddly. That one thing made the difference for me. The lifetime access to recordings is not a marketing line — I still rewatch the clustering session before client calls.

Sneha Kulkarni ★★★★★
BI DEVELOPER · HYDERABAD
The Power BI and Tableau portion was the strongest part for me. We built dashboards on messy datasets instead of clean tutorial files, so the interview assignment felt like something I had already done twice.

Aditya Raghavan ★★★★★
ML ENGINEER (FRESHER) · BENGALURU
Final year student here. What helped was the mock interviews — I did seven and the feedback after each one was blunt in a useful way. The Gen AI module is genuinely current, not a bolted-on chapter.

Priyanka Sahu ★★★★★
CAREER RESTART · BHUBANESWAR
I joined after a four-year career break and was nervous about keeping up. Weekend doubt sessions and a WhatsApp group where mentors actually reply made it manageable. Placed as an analyst in five months.

Karthik Subramanian ★★★★★
DATA SCIENTIST · CHENNAI
Fair review: the pace in the statistics module is fast and you will need extra hours on your own. Everything else was solid — the project certificate listed the exact work I did, and two interviewers asked me about it directly.

Md. Faizan Ahmed ★★★★★
ANALYTICS CONSULTANT · DELHI NCR
I was already working, so the evening batches were the only way this was happening. Nothing was rushed to fit the schedule. My manager noticed the dashboards changed within a month of me starting the course.
